Someone should have grabbed this when the price
was LOW! I had thought that RF Parts was
selling new EIMACs for under $400 so I cut my
price. SURPRISE! They have surplus EIMACs for
$439.95, or new Chinese Pentas for about the
same price.

Sooo: The price for this new, sealed EIMAC
4CX1000A tube is $400, which will cover UPS
shipping and insurance in the US.

If you have an amp that uses this tube or
you're thinking of building one that does,
you can't afford to pass this up. You'll kick
yourself....

8. Wanted: Kenwood power plug

Newsgroup: rec.radio.amateur.swap

I am in need of a power plug for my Kenwood TS-820S. Actually is is a jack that fits on the back of the unit and allows for either 120/200V AC or 12V DC, depending on how it is wired. The jack's holes look like this:

| | - -

- - - -

| | - -

It is about 1 1/4 inch wide by 1 inch tall. This item fits on the back of the TS-820 and is connected to a 2-wire wall plug.

If anyone can direct me to a source for this type of jack, THANKS!

I'm looking for a pocket organizer, preferably something that has an operating system, DOS-ish, like the Atari Portfolio. But inexpensive. It needs to have a PC interface (serial or parallel).

I have a Radio Shack HTX-100 10 meter amateur transceiver. It's in good condition with manuals; I'd consider trading it for a well equipped prganizer package.
